  - Home
    - logo
      - Stamp type logo/icon for myself
        - Stamp: envelope interaction
      - some ghibli kind of mascot logo
    - Top: Mount fuji + Japanese temple
      - Lantern - dark + light mode
    - Intro
      - Elements
        - floating design objects
        - visual work showcase
        - intro text
          - text
          - elements
          - mention where i am currently working, ex employers
            - also mention btech and CSE grad
        - CTA: resume + work
    - tech stack/stack
    - case studies
      - primary projects
        - AppX
        - DreamLaunch X Bounce
        - eight.money
      - vibe coded projects
        - Uxie
        - Spiderman cards
        - “Little lights“ for Diwali
      - other projects (but on work page)
    - visual experiments
    - Why i like japanese design (archive)
    - what am i learning these days (archive)
    - Footer
      - Reach out/ hire me so that i can fund my dream japan trip
      - calendally
      - Japanese illustration
  - About
    - Pictures + Journey
      - tech savvy
        - my dad was the first one in family who got a computer in his family & used to be super fond of digital gadgets : that’s where my interest in tech came from
      - started from MS pain + Photoshop
        - always the kid my drawing teachers used to love + used to send to drawing competitions hahah
      - Used to get flabbergasted with so many information on the internet
      - got curious about how tech works
      - started on twitter
      - attended tech meetups
        - wrote blogs
          - 100 days of code
            - did frontend dev alot
      - got internship in one of the biggest tech education platform called GFG - like a dream come true
        - as a designer, as i picked up design
        - learned alot about visual design - explored alot
        - got a really nice farewell as an intern, my creative instincts since childhood mixed with tech and creative direction - gave me an headstart
      - then, sky was the limit
        - to understand this industry well i took alot of freelance gigs : majorly included working with tech startups in Bangalore: such as Keploy and Dualite
      - Worked with Some of the best luru startup founders, A design studio and now at a YC backed org called AppX
    - Interests
      - Painting
      - anime
      - movie
      - clay modelling
      - rangoli
      - cafe hopping
      - sketching
      - & now vibecoding as well
    - one thing i like in particular - going to Design meetups
    - why i like japanese design
  - Work
    - primary
    - vibe coded
    - other
      - gfg
      - keploy
      - dualite
